

PR-124

PRINTER PORT INTERFACE PROTECTOR

Printer port interface is a standard interface for computer peripherals. Nowadays it becomes popular interface for the computer and other equipment such as net work hard disk tester, data transmitter, and etc

One computer can connect with various equipment. In the meantime, it is inconvenient to take part in the connector. It causes to do damage to the interface if the quality of the equipment is not well. The PR-124 is designed with protection function to avoid this situation.

Features

The PR-124 is a two-way protector that one PC can link with four printer port interfaces or four PCs can connect with one printer port interface. (The traditional unit only have one-way function).

The PR-124 is designed with protection to avoid external equipment causing damage to PC interface. The PR-124 is small, portable and suitable to any PC. (such as notebook PC)

Note: For Notebook PC users, they have to send whole set of notebook back for repair if the printer port interface is defective. It costs both money and time for the user.

Instruction

Make sure that the PR-124 connects well with the printer port interface of the PC

When using printer port interface, users only need to plug the connector of the equipment in the PR-124 and choose correct print port to start working.

It is not necessary to adopt external power in common situation. It will need 9V/100mA power when the Extended cable is more than 1m. (Optional Accessory)

Physical & Environmental Specifications

Dimension : 12.5cm × 9cm × 2cm

Weight : 0.35kgs

Temperature : +5 to +45

Humidity : up to 90% noncondensing

Altitude : up to 5000m

Standard Accessories

Mainframe

Printer cable

Optional Accessory

9V / 100mA power supply
